1079. Maximum

Time limit: 2.0 second Memory limit: 64 MB

Consider the sequence of numbers a_i , i = 0, 1, 2, ..., which satisfies the following requirements:

- $a_0 = 0$
- $a_1 = 1$
- $a_{2i} = a_i$
- $a_{2i+1} = a_i + a_{i+1}$

for every i = 1, 2, 3, ...

Write a program which for a given value of n finds the largest number among the numbers $a_0, a_1, ..., a_n$.

Input

You are given several test cases (not more than 10). Each test case is a line containing an integer $n \le 99999$). The last line of input contains 0.

Output

For every n in the input write the corresponding maximum value found.

Sample

input	output
5	3
10	4
0
